Memo to File:

Re: ACT/015/016
Chinook Construction Ltd.

On May 14, 1978 the period for public comment on the above operation closed with no adverse comment being received. The operator has already posted a \$10,000 bond with Travelers Indemnity Company as surety. The operation is now due for final approval from the Board.

The mine has been closed since December of 1977 and the operator has adequately regraded the disturbed land as noted by a field inspection on February 28, 1978. The requirement for the land and the Division will release \$9,000 and retain \$1,000 to provide adequate surety for revegetation work as set out in Rule M-10 (12).
